DEALER IN BONES HELD IN CUSTODY

John Danker of North Freedom Was Arrested Here This Morning by Request of Evansville Police.

Over the telephone early this morning Chief of Police George Appleby was informed by a woman who refused to give her name that a party of three people who were wanted by the Evansville police were at that moment standing on the C. & N. W. depot platform. The woman refused to give any further details and the chief proceeded to call up Evansville over long distance. After he had verified the fact that there was a warrant out for the arrest of a man named John Danker, a junk dealer, who was supposed to have been in North Freedom and to be traveling about with his wife and another man, he started for the depot. Just as he stepped out of the city hall he came upon a trio whom he at once suspected of being the party in question, and upon learning that one answered to the name of Danker, requested them to accompany him to the station. Mr. and Mrs. Danker and their associate, Wm. T. Carpenter, all admitted having shipped a quantity of bones out of Evansville last week and averred that they were going to pay for them in soon as they received their \$12 to \$14 a ton from the Chicago headquarters. They denied the imputation of Deputy Sheriff Fred Gillman that they had taken the stuff without permission and shipped it to Oregon and thence to Chicago. Deputy Gillman was expected here at three o'clock this afternoon.

BUCKET SHOP LAW GOES INTO EFFECT

Act Passed by Last Connecticut Legislature in Effect Tomorrow.

[SPECIAL TO THE GAZETTE.]
Hartford, Conn., June 30.—Proprietors of the hundred or more bucket shops throughout Connecticut are today engaged in winding up their affairs preparatory to quitting business. Tomorrow the antbucket shop law passed by the last session of the legislature comes into effect and henceforth it will be unlawful for such establishments to operate in this state. Severe penalties are provided for violations of the law, including a heavy fine and a jail sentence of from sixty days to one year for a second offense.
The Connecticut law is modeled after the Indiana law, and defines a bucket shop so comprehensively that there seems no loophole in it. It provides that any broker must on demand furnish a customer with a written statement of the name of the person from whom a purchase or to whom a sale was made, together with the time, place and price, at which the transaction took place. Refusal or failure to do this is prima facie evidence that he is not a legitimate brokerage business, but is running a bucket shop.

HOW JANESVILLE IS VIEWED IN DETROIT

What Might be Accomplished Here if the City Was Made Janesville Beautiful.
[SPECIAL TO THE GAZETTE.]

Detroit, Michigan, June 20.—The citizen of Janesville, who fails to become enthusiastic over the work of your improvement association should come to Detroit and spend a couple of days in a tour of the boulevards and parks. If he does not go back to Janesville converted to the civic improvement idea he should be met at the station by Janesville friends and presented with a life membership in the society of Disapprobation Citizens.

Detroit may be known far and wide as a manufacturing center for drugs and automobiles, but it is probable that neither of these industries are as directly responsible for spending the name of the city as are the facilities afforded for giving visitors a good time. Right now every hotel is full to overflowing with conventions. Delegates from every part of the country are holding their annual meetings for the betterment of trade-conditions. Every one of these delegates will go home with a pleasant recollection of the city, not because any weighty questions of trade were settled, but because he was well-entertained every minute of his stay.

The facilities possessed by Detroit for providing this entertainment are largely natural. It is true, but the city is deserving of no less credit for the way in which they have been utilized. Past boat lines have been created that carry people at trolley-car rates to a half-dozen resorts up and down the Detroit river. During last summer the government records show that 2,802,558 persons left this port by water on route for somewhere. Chicago with its immense population shows a record for last summer of but 1,967,394 steamer passengers.

Within the limits of the city the entertainment facilities are of a nature that appeal to every visitor. Circling the center of the city at a distance of about three miles is the grand boulevard, decorated through the middle of its course for long stretches with trees, shrubs and flowering plants. At the eastern end of this horseshoe shaped drive is located the bridge that connects the city with Belle Isle, Detroit's own pleasure resort, an island of seven hundred acres lying in the middle of the river.

Of Belle Isle alone a lengthy article might be written. At one time it was wild, uninhabited, marshy area. It is now undoubtedly the finest park and public playground owned by any American city. Giant oaks, oaks and beeches line the wide, level drives and combine to form delightful picnic groves. The whole southern part of the island is an immense lawn planted with shrubbery and cut in every direction with canals over which ornamental bridges pass wherever road and water intersect. Public shelters for canoe-owners are provided and there are hundreds of those graceful craft to be seen upon the canals by day and night. Public bandstands are given several times each week upon a covered stone bridge, which spans the main canal. Upon such occasions these brightly decorated canoes form a solid mass upon the water for several hundred feet in both directions from the stand.

Public bath-houses are also provided at which one may obtain a suit for a nominal sum and take a dip in the clear water of the river. It is no uncommon sight to see a thousand people of all ages swimming, jumping and diving from the piers that extend into the river in front of the bath-houses. An athletic field and a dozen baseball diamonds have been laid out upon a large cleared area.

A "zoo" is one of the features of the island that attracts its host of visitors. One large brown bear secures the attention of every one. His specialty is the common peanut. Upon a busy day he will crack and eat a bushel of these, thrown at him from all directions by children and grown folks. The keeper declares that the bear earns his own keep and would not escape if given the chance.

In talking about Detroit and its pleasures, spots I have kept in mind an opportunity that is within reaching distance of the people of Janesville. No finer thing could be done for the city than the conversion of "Goose Island" into a miniature Belle Isle. The plan indicated by Dr. Dwight for the reclaiming of his unsightly strip of waste land would provide Janesville with a picnic ground along Rock river and serve as an invaluable advertisement for the city visitors and to passengers upon both railway lines. During a single summer one or two big steam shovels could scoop enough earth from canals to raise the land level above high water. After that the work of making a fine public park would be comparatively easy.

I am not informed as to what progress has been made in executing the plans of the improvement association. The work however should receive the encouragement of every public-spirited citizen. The money spent will be returned a hundred-fold within the lifetime of the present generation.

Make the city attractive to visitors, whether they come to play golf or to look for a manufacturing site. When a man comes to Detroit he is at once impressed with the city as a place of residence. The question of freight rates and cheap labor is lost sight of in his admiration for the advantages which the city holds forth in the way of broad, clean streets and playgrounds for his children. Janesville with its enlarged railroad facilities and acres of factory sites is now prepared to take a big step forward. All that is needed is the public spirit that will beautify the city and create this last and most important inducement for visitors to take permanent residence in "Janesville The Beautiful."

"Jackson" Model "G"

5 passenger car

Positively the most powerful two-cylinder car on the market. Perhaps you have thought that it takes a 4 or 6 cylinder car to give you absolute satisfaction in touring Wisconsin roads. If you could get just what you want for \$1250.00 wouldn't it be foolish to pay a thousand dollars or so more?

We claim a good many things for this car: Beauty, comfort, silence, power, speed, easy control, accessibility of parts, economy in fuel and tires, and many other features that can be easily shown by an inspection of the car. And we will be only too glad to have you make us prove our claims by a demonstration. Don't take the word of some prejudiced friend, a mechanic, as final; bring him along and we will show him too. A demonstration puts you under no obligation whatever and it is your only way of choosing a car judiciously.

Will Interest Wives.

A Brooklyn wife has found a new way to make her husband disgorge a portion of his earnings. He was \$15 shy on his food bill and refused to come to the center. Then she got a strangle hold on his windpipe and extracted his store teeth. These she kept for ransom until the half-starved man was forced to produce the amount.

Another Fallacy Exploded.

The fact that insanity is much more prone to produce in art what is commonplace than what is original, may, perhaps, be borne in mind by those critics who are so ready to brand as morbid and decadent every artistic development which conflicts with conventional models.—London Lancet.

Real Home Rulers.

The brains of the average home are not all packed away in the cranium of the male head of the household. The real ruling, managing force of the home is the wife. The husband earns the money, it is true. But if he had the spending of it, the result would be chaos. The wife is the real chancellor of the exchequer.—Weekly Dispatch.

Prophetic Dream Fulfilled.

It was stated at an inquest on a Dean Forest (England) collier, who had become entangled in the machinery, that on the previous night he woke up his wife and told her he had dreamed that while working with the machine an accident occurred and he had fallen into it.

Scarcity IN Haying Tools

THIS SEASON HAY CROPS ARE LARGER THAN ANTICIPATED AND THE OUTPUT OF RAKES, MOWERS AND HAY LOADERS IS ABOUT ALL SOLD.

The factories report all over that they have sold out on haying tools. Orders for them cannot be filled daily. This season's hay crop is going to be enormous and considerable difficulty is expected in the harvesting. Farmers who have not yet purchased their hay rakes, hay loaders and mowers will be very glad to get the news that I have just received a car load of the famous Dain side delivery hay rakes and Dain hay loaders. There is to be no advance in my prices owing to the scarcity this year and those I have on hand will be sold to my trade. I suggest that you order these goods early as they won't last.

I sell the famous McCormick Mowers which I consider the best in the market.

The Dain Hay Tools are generally known in this country and I can recommend them heartily as my experienced with them is that each one sold makes a satisfied customer.

Call me up over either phone and have me reserve one until you can look it over.

TEACHERS MEET IN CLEVELAND

NATIONAL EDUCATIONAL ASSOCIATION IN SESSION.

PROGRAM IS INTERESTING

Four Cities Have a Big Spelling Match, in Which Two Young Girls Make Perfect Scores.

Cleveland, O., June 30.—The largest and most varied program in the history of the National Educational association marked the opening of the forty-sixth annual convention of the organization, which began a five days' session here Monday. Thousands of delegates were kept busy taking part in the day's events.

Cleveland bristled with entertainment. The streets and buildings are gayly decorated. It was a day of bustling for the transportation companies as well as the pedagogues. A special depot was constructed to care for the baggage. Thousands of Cleveland homes were thrown open to entertain the visitors. Hotels, restaurants and boarding houses are reaping a harvest.

Cleveland Wins Spelling Match.
One of the interesting features of the program, although not a part of the official convention routine, was a spelling contest between eighth grade pupils, in which a team of 15 representing each of four cities entered. The Cleveland schools challenged the schools of the country. Pittsburgh, Pa., New Orleans, La., and Erie, Pa., accepted the challenge. In this match, the members of the teams were mixed and each contestant was known by a number only. First there was a written contest of 100 words and then oral spelling of about 250 words.

When the scores were compiled it was found that Cleveland won with a total of only 38 errors. Pittsburgh was second with 47 errors, New Orleans third, with 60, and Erie, fourth, with 85.

Two girls, Mae Thursday of Pittsburgh and Marie Holden of Cleveland, had perfect scores. Three missed but one word. Miss Holden is colored. When her record was announced she received reported cheers from all parts of the big theater.

First General Session.
The first general session was held in conjunction with the national council where addresses of welcome were made, responses heard and Charles P. Thwing, president of Western Reserve university, Cleveland, made a report upon the "Educational Progress for the year."

The musical numbers were the feature of the afternoon general session. The work of the boys' chorus, of 500 voices under the direction of J. Powell Jones, director of music in the Cleveland schools, was favorably commented upon.

At the evening session there was another elaborate musical program and the annual address of Vice-President Nathan C. Schaeffer, state superintendent of public instruction, Harrisburg, Pa., who was acting president in the absence of President Edwin G. Conley, superintendent of schools, Chicago, who is in Switzerland.

Rhodius Brothers Arrested.
Chicago, June 30.—Herschel P. Rhodius, Edward T. Rhodius and Thomas Rhodius were arrested late Monday afternoon charged with using the mails in a scheme to defraud. The three brothers organized and promoted the Central Life Securities company and numerous subsidiary corporations, through which they are alleged to have obtained \$3,000,000 in the last few years.

HIGH LICENSE IN LOUISIANA.

Senate Has Passed the Shattuck-Gay Liquor Bill.

Baton Rouge, La., June 30.—That Louisiana shall be a high license state for the next two years at least was finally decided by the assembly Monday night when the senate passed the Shattuck-Gay liquor bill by a vote of 29 to 4. This measure has passed the house and is known to have the governor's approval. It fixes the minimum parish license at \$500, minimum state at \$200 with maximum licenses running up to several thousand dollars each.

Jealousy Causes Bloody Tragedy.

Salt Springs, Ill., June 30.—Jealous of his young wife and mistaking his love for another man, Julius Turner, 68 years of age, a civil war veteran and wealthy farmer of Clay City, Ill., shot his wife to death from ambush, seriously wounded his 15-year-old son and attempted to commit suicide Monday night.

Merchant Is a Suicide.

New York, June 30.—William D. Sloan, a New York paper merchant, having a store in Nassau street, committed suicide in his home in Brooklyn Monday by inhaling gas. He had been despondent for some time, due to an attack of paralysis.

Marshall Kills a Robber.

St. Joseph, Mo., June 30.—Matthew Ford, town marshal of Osburne, Mo., killed a robber in an exchange of shots Monday. Ford found two men in a hardware store at Osburne. One of the men fled. The other fired at the marshal with a shotgun.

AIRSHIP IN GREAT FLIGHT

ZEPPELIN'S MACHINE STANDS LONG AND HARD TEST.

Remains in the Air for Nearly Seven Hours, Attaining a Speed of 38 1/2 Miles.

Friedrichshafen, June 30.—Count Zeppelin's airship Monday stood brilliantly the longest and most searching test it has yet undergone. It remained in the air for six hours and three-quarters, attaining an average speed of 34 1/2 miles an hour throughout, although for a short period the speed reached 38 1/2 miles, the highest rate yet accomplished. The airship carried 14 passengers.

The wireless apparatus successfully underwent severe experiments, working without a hitch during the entire period. Count Zeppelin came here from Dresden to supervise the tests. The balloon left the floating shed shortly before noon and was towed a mile by a motorboat. Then, utilizing only its dynamic force, and without casting out any ballast, it ascended slowly and majestically to an altitude of 1,000 feet. It started off toward Constance at full speed and then turned in the direction of Romanhorn, in Switzerland, where it went through a long series of maneuvers, all the working apparatus working to the utmost satisfaction.

UNCLE SAM TO GIVE MEXICO AID

TROOPS ARE ORDERED TO THE BORDER CITIES OF TEXAS.

TO PRESERVE NEUTRALITY

Trouble at Las Vacas Seems Ended and Mexican Government Says the Outbreaks Have Ceased.

Washington, June 30.—By direction of President Roosevelt, Secretary of War Taft has issued orders to the commanding general of the department of Texas, at San Antonio, to send a sufficient number of troops to Del Rio, El Paso and other points in Texas to add the civil authorities in preserving order. This action was decided upon as a result of the request from the Mexican government that the United States do its utmost to prevent any violation of the neutrality laws.

The request of the Mexican government was referred to the attorney general by the state department, and the governor of Texas in the meantime was asked to aid in compelling obedience to the law. The order of the president sending troops to the border is understood to have been made upon the recommendation of the attorney general.

Troops Scatter Bandits.
Monterey, Mex., June 30.—Troops of the Seventh regiment, which left Matamoros in pursuit of the bandits who attacked that village, encountered them Monday afternoon after several hours of pursuit. No details of the fight have been received here except that the bandits were defeated and that they scattered in several directions and will probably escape as they are well acquainted with the territory and the troops are not.

All Quiet at Las Vacas.
Del Rio, Tex., June 30.—The trouble at Las Vacas seems to have come to an end for the present and everything is expected to continue quiet.

Reinforcements of cavalry arrived Sunday from C. P. Diaz and are securing the country in search of the insurgents. The river is heavily guarded to prevent their crossing to this side. The cavalry reported the finding of the dead bodies of two more insurgents Monday afternoon. Parties crossed the river Monday and made arrangements for the return of an Austin fishing party at Del Rio. No apprehension has been felt here for their safety. The party was reported as having been seen on San Diego river Sunday.

No Recurrence of Disorders.

City of Mexico, June 30.—Up to Monday evening no news of any sort had been received at the capital that would indicate that there had been a repetition of the disorders similar to those which occurred at the towns of Viesca and Las Vacas. On the contrary, at the departments of the interior, war and state, it was stated that absolute quiet reigned in the region where the two small bands of insurgents had been operating.

PULLMAN CAR ON FIRE.

Trainmen on Board in Serious Peril for a Time.

Richmond, Va., June 30.—While the Chesapeake & Ohio passenger train from the west, due in Richmond at 8:35 Monday morning, was approaching Gladstone the crew on the Pullman car Sueno discovered the car was on fire. Only the trainmen were aboard.

The bell-cord was burned on the forward platform and when the men fought their way through the smoke in the car they found the door of the car about locked and communication with the engineer and escape from the burning car cut off. A lantern swung by the conductor from the rear platform caused the engineer to stop. It seemed certain the car would be destroyed. The engineer then ran the train at full speed to Gladstone, where the flames were put out. No one was hurt.

TALLEST OF SKY-SCRAPERS.

Equitable Life Will Erect a Sixty-Two Story Structure.

New York, June 30.—Plans for a new sky-scraper, which will overtop all New York's lofty buildings and the flagpole of which will pierce the sky at a greater height than the Eiffel Tower in Paris, the highest structure in the world, were filed Monday by architects for the Equitable Life Assurance society with the building department.

The projected building for the Equitable will be a 62-story structure, 909 feet from the curb to the tip of the tower, upon which will be stepped a flagpole 150 feet in length. The ball on the flagpole will be 74 feet higher than the 385-foot steel Eiffel Tower.

DENTIST

When teeth begin to decay they should be seen at once, so as to arrest the process of rotting. If taken in time, decay can be prevented in the teeth of old or young. But there must be no delay. Once decay starts, the whole set is liable to become contaminated. My speciality is to take care of your teeth. I look after them in such a way as to prevent decay, or remove it when apparent and stop the rotting process.

My work will be Good Work. Good, as to quality—and Good because it will be done with the thought constantly in mind of Not causing the least pain.

When it comes to prices you may depend upon getting a "square deal," as President Roosevelt says. I don't want all the money you have left.

Try me for your next Dentistry.

MORE WORRY FOR BELOIT BAR-PROP.

Must Submit to City Council Inquisition Before He Can Get Renewal of His License.

If a resolution passed by the Beloit common council last evening is carried out, all of the Lino City saloon-keepers excepting two or three will be submitted to a severe inquisition before being allowed to renew their licenses and a possibility that licenses may be refused looms up threateningly in the middle foreground. The resolution provides that every bar proprietor who was a member of the so-called Saloon-keepers' Association shall be examined by the aldermen with regard to the role he and his associates played in the recent municipal election. The various lines of investigation will be concerned with the saloon-keepers' part in the alleged colonizing of Italian; the contributions of money by the brewers; and the movements of the organization in selecting candidates for office and paying their expenses. Particular stress will be laid on this last mentioned line of inquiry as it is claimed that the Association selected candidates in every ward and financed their campaigns. About thirty-five saloon-keepers are said to have been identified with the Association, with only two or three remaining outside of the fold.

LOCAL PARAGRAPHS.

Sidewalk Contention Settled: Members of the highway committee of the common council and city treasurer James Fathens held another conference yesterday, with regard to the proposed sidewalk construction work on S. Bluff street, from Machine to Clark street. According to the agreement finally reached Mr. Fathens is to build the walk to the line established by the city engineer, the city to bear the grading expense. This leaves the way open for neighbors to go ahead with their improvements and that section of the Third ward, will soon be as attractive as any in the city.

Blinded by Flying Knot: A Nasel who operates a wash and dye factory at Sparta, came here yesterday to consult Dr. J. P. Thorne, regarding injury to his right eye, sustained while saving a board. It appears that a fragment of a hard knot thrown off by the saw struck him in the right eye with sufficient force to knock him down and the sight seems to have been entirely destroyed. However, there is some hope of saving the injured member and Mr. Nasel will take treatment here for several days.

Automobile Party: A belvedere automobile party consisting of C. H. Chamberlin, the Misses B. C. J. L. and Ruthie Trippe and E. E. Prender and son, was registered at the Hotel Myers last evening.

Jailed for Drunkenness: Thomas Parkinson was unable to pay a fine and costs amounting to \$2.10, assessed him for drunkenness, in municipal court this morning and went to the county jail for four days. Austin Arner was unable to pay \$3.10 and went to the battle for eight days.

Mary Rafter Leaves Town: In municipal court this morning Mrs. Mary Rafter refused to plead guilty to the charge of being an inmate of the resort at 327 S. Main street, alleging that she stopped there to see Mrs. Rice and was taken ill, and to avoid subjecting the county to the unnecessary expense of a trial District Attorney Fisher recommended that the action against her be adjourned with the understanding that it would be dismissed if she took the next train for Chicago and did not out of Janesville and Rock county, hereafter. To this the prisoner readily agreed and the court adjourned the case two weeks.

Married at Court House: Albert H. McMaster of Clinton and Ada Everhart also of Clinton were married yesterday afternoon at four-thirty at the court house. They obtained a special permit and were married by the Rev. J. W. Laughlin.

Beauty's Age.

How to lengthen life and beautify the body is a constantly growing preoccupation. The age at which women will attain to the full development of their personal beauty will soon be 40, and famous examples, such as those of Cleopatra, who was over 30 when Marc Anthony placed his victories at her feet, of Diane de Poitiers, who reached the acme of her charms at 40, or of Dejazet, who at 70 was still full of juvenile grace, will no longer be regarded as exceptions.

Motto from Ruskin.

"Try to get strength of heart to look yourself fairly in the face in mind as well as body. I do not doubt that the mind is a less pleasant thing to look at than the face, and for that very reason it needs more looking at. So always have two mirrors on your toilet table and see that with proper care you dress body and mind before them daily."

Industry.

Repetition is the mother, not only of study, but also of education. Like the fresco-painter, the teacher lays colors on the wet plaster which ever fades away, and which he must ever renew until they remain and brightly shine.—Richter.

American "Militarism."

That America as a nation is getting more and more inoculated with what the Germans call "militarism" is shown in many ways. One indication of this is given by a huge sign hanging outside the car barns at Seventh avenue and Fifth street, which reads: "Recruiting Station for Motoramen and Conductors."—N. Y. Press.

Cough Cure Good as Cream.

Here is a simple cough syrup that is as pleasant to take as an ice cream. Grate the rind of one lemon and squeeze the juice from two over about two tablespoonsful of sugar. Do very carefully to grate only the yellow, as the white gives a bitter flavor. Add the juice and grated rind of orange, let this stand 10 or 15 minutes, then strain through a cloth. The result is a refreshing syrup which quickly relieves irritation in the throat.

LOCAL STOCK MARKET DEPENDS ON CROPS

Good Crops Will Mean Good Prices For Cattle and Hogs Next Fall.

If the crop of rice and barley turns out well, this year promises to be a good one for the stock buyers of this city. There are at present but four men engaged in buying stock in the vicinity of Janesville while at Examine there are several. Besides the three local buyers, Mr. Howard, Richards and Co., Charleston, Geo. Thurman, a buyer for the Evansville Live Stock Commission company has entered the field to purchase hogs and cattle. Last year the market was very poor owing to the high prices offered for rice and barley; the farmers preferring to get the money for the grain than to feed the hogs. Because of this hope of any weight whatever are scarce, many of the farmers selling the swine, that should be coming to market now, as pigs instead of fattening them. All winter the buyers have had a hard time to get cattle and hogs and some of the local butchers have shipped in stock from outside and the buyers are not able to secure enough to make up a carload to ship. This condition has prevailed for some time but it is hoped that by the last of August or the first of September that there will be a decided change for the better.

SCHOOL CENSUS IS NOW BEING TAKEN

S. C. Burnham, Clerk of the Board of Education, is Taking Annual Census.

S. C. Burnham is now taking the annual school census of the Janesville city schools. This census is taken every year and includes all children attending the city schools from the age of four to twenty, including nineteen.

When finished the census will be presented to the local school board and will be finally sent to the state officials. The appropriation of state and county money for school purposes is made, using this census as a basis of apportionment.

The census is taken by a home-teacher canvass and as the number of school children last year was something over four thousand, it is considerable of a job.

Value and Protection of Street Trees.

Municipalities have of late much awakened to the value of street trees and the advisability of protecting them, more especially since several eastern courts have placed a value of several hundred dollars on the old specimens damaged by public service companies through their wire strung vandals. These latter look upon all street trees as so many obstructions and place no value upon them. This is evident through the ruthless and unnecessary butchering indulged in by all them. That neither the public nor the abutting property owner has any rights or privileges in the matter seems to be taken for granted.

Clean Up.

The most unsightly feature of a town at present and one that may easily be removed is the vacant lot crop of weeds. Just now the weeds are going to seed and should at once be removed and burned. Not only will this improve the looks of the streets and towns in general, but the destruction of this year's seed crop will materially reduce next year's weed crop upon these areas and adjoining premises. "One year's weeding makes seven years' weeding" is all the truth and none of fiction. You're next. Get busy.

Flower Decked Windows.

There is an idea which could be adapted to the beautifying of towns with great advantage. The municipality of Paris offers prizes for the most attractive window decorations by using blooming plants, there being several classes in which competitors may strive—that is, single windows, whole house fronts and the fronts of business establishments.

Durham Gold Medal Flour is the only "best".

How Fortunes Are Made in Advertising

There never was a time when so much money was made, in so many advertised lines, as today.

So many advertisements are worth reading now that people have learned to read them.

Never did good advertising win so easily.

Never was poor advertising so certain to fail.

Never was ability so much in demand, nor experience so essential.

These are no times for the amateur.

Success goes today to the qualified.

That's why we spend more on our copy department than on any other part of our business.

The head of this department, Mr. Claude C. Hopkins, receives \$1,000 per week.

A record salary in advertising.

But Mr. Hopkins has made more money for advertisers, in more different lines, than any other man has done.

His supremacy, as a salesman in print, is unquestioned.

Mr. Hopkins supervises all of the copy which goes out from this agency.

With Mr. Hopkins are some of the ablest advertising men in America.

Men whom we have picked out, in the course of years, by the brilliant results we have seen them accomplish.

And we want more of them.

We want those men who have shown the greatest results, regardless of what we must pay them.

This department is not an expense—neither to us nor our clients.

These men make accounts grow by making them pay.

They create advertising which would never exist save for their ability.

It is cheaper for us to develop business in this way than to pay men to solicit.

Our Advisory Board

Our Advisory Board consists of sixteen men, all masters of advertising.

Each is a man of vast experience and of proved ability.

Mr. Hopkins is at the head of it.

Before this whole Board comes each campaign which we undertake for a client.

The methods, the copy, the mediums, the schemes are worked out in conference.

They are worked out by men who, in this vortex of advertising, learn something new every day.

Thus we bring to each new problem the lessons of all we have done.

Such is the price of success.

Yet we handle advertising on the usual agent's commission.

On experimental campaigns, on articles with possibilities, we frequently spend ten times our commission in working them out.

Our profit comes when the account expands, because we have made it pay.

This able service costs you no more than the service of minor men.

And think what it means if it multiplies your results.

How to Make Advertising as Safe as a Bond

Let us decide, first, if your article has possibilities. Submit your problems to our Board of sixteen men.

You are welcome to their advice.

They have advertised more things, in more different ways, than any other set of men in America.

They are likely to be right.

If what you want is possible, we will tell you how to accomplish it, and with but a trifling risk.

If it is newspaper advertising, we may suggest taking up six towns.

If magazine advertising, we may suggest a few mediums.

The experiment, perhaps, will cost us ten times our commission. But when we are done you'll know.

What we do in six towns can be done in six thousand, and the profits will be in proportion.

The law of average is sure. When you expand, you will be spending your money on an absolute certainty.

We hope that no man who has the right article can neglect such an offer.

Please think what it means. Your risk, at the most, is a trifle.

Any loss is improbable. We don't give

time and attention to lines that we can't make pay.

If you succeed in those six towns, a whole country lies ready to bring you results in proportion.

That is how fortunes are made in advertising.

Not by trusting to unguided efforts. Not by trying to learn for oneself what we've learned in 35 years.

Advertising today demands all the ability, all the experience at one's command.

Employ the best talent you know. Don't trust mediocrity. Success means too much.

To the Successful

We seek, too, those who are already successful.

Those who want to know what better ideas our brilliant men can work out for them.

Those who seek new view-points. Those who wish to make sure they are getting the best of their possibilities.

Our proposal to them is this:

Continue, if you wish, your present relations. But give us a few towns or a few general mediums.

Let us bring to bear, in some small way, the force of our ability. Then let the results decide who deserves your advertising.

That is the only way. Others may argue about as well as we. The field is full of able solicitors.

But there is one tribunal that never errs—the tribunal of traced results.

We refer our case there. Won't you?

Please cut out this coupon—now while you think of it. Send it to get our book "Safe Advertising"—a brilliant example of our advertising powers.

Then judge for yourself if you need us.

A Reminder

To send to Lord & Thomas, Chicago, for their book, "Safe Advertising."

Please state name, address and business. Also the position that inquirer holds in the business.

A GOOD HEDGE.

How Honeyuckles Can Be Planted to Offset an Ugly View.

It may be that you are planning a new hedge this year to shut out an ugly view or intruding animals or to form a boundary line, says the Des Moines. For this purpose the common honeyuckle, *Lonicera maiclii*, is worthy of consideration. A simple but strong wire fence will support it perfectly, and the roots may be set in at almost any time of the year. The vine grows rapidly, showing a disposition to take care of itself even to the extent of choking out poison ivy or other climbers that endeavor to invade its stronghold. Its habit is to grow to the top of the fence and then to droop down gracefully on either side. A close wall of green is soon formed, so close, indeed, that dogs give up the attempt to push themselves through its mass of intertwined twigs. The flowers return for a second blooming, casting always to considerable distances their soft, delicate scent.

A hedge of honeyuckle vines, moreover, is less costly than one of box or privet, and it does not require the clipping and care of the latter. Often such a hedge forms a desirable wind-break, especially for the rows of a garden. Trained over a simple framework, it makes a delightful canopy for a garden bench.

The Victim of Drink

Needs Orino Treatment

Drink first destroys ambition; breaks up ties of friendship; it kills and buries love and eventually destroys the family life. Some of the best men in the world have been victims of drink and if there is not some member in your family that is afflicted with this disease, you are indeed fortunate. Drink cunningly destroys the will power, and while the drunkard wants to do what you tell him, he wants a thousand times more the drink that he craves. Drunkenness is no longer considered a crime; eminent scientists and physicians have agreed that it is a disease and must be treated as such. The home treatment that has been used for a number of years, is highly successful, is Orino, and is sold under a positive guarantee that it does not affect a cure your money will be refunded. Orino is in two forms. When desiring to give secretly, purchase Orino No. 1, and if the patient will voluntarily take the treatment, Orino No. 2 should be given. The guarantee is the same in either case. Orino costs but \$1 per box. Mailed in plain sealed wrapper on receipt of price. Write for free treatise on "Drunkenness," mailed in sealed envelope by The Orino Co., Washington, D. C., and in this city by People's Drug Co. and King's Pharmacy.

A report issued from the department of agriculture states that the annual loss occasioned through the tick in the neighborhood of \$100,000,000, which is equal to about ten per cent of the value of the cattle. You Know Good Beans Just as Well as We

We shall not need to argue if you'll try Van Camp's. Compare them once with others. Judge which you like best—you know your taste. All the world would use Van Camp's if all the world did that.

You can get a small can of Van Camp's for ten cents. And that one can will tell you more than our ads can tell. Perhaps you are baking your beans at home. That can will tell you what a mistake you are making. Perhaps you are using other brands. That can will tell you the remarkable difference. Won't you spend ten cents to know, for all time, the best beans that ever were baked?

Why do you suppose that millions now use Van Camp's? We can scarcely find enough beans, of our grade, to supply them.

They once baked beans at home, perhaps. They once used other brands. Why are they coming, by millions, to swell the enormous demand for Van Camp's?

A single can will tell you.

There are myriads of brands of beans. Some of them cost the grocer only half as much as Van Camp's. Some makers give to grocers one case free in five.

Yet—with all these factors against us—Van Camp's have won by far the largest sale in the world. Don't you want to know the beans that have done that?

Some think of beans as a homely dish—a simple dish—a dish that every housewife knows.

Please let us change that idea. Home-baked beans are nothing like Van Camp's.

Home-baked beans are mushy and broken. They are crisped on the top and half-done in the middle. They ferment and form gas because they are not digestible.

That is because you bake in dry heat—in too little heat. You can't bake in live steam, as we do.

Our ovens are heated to 245 degrees. That fierce heat separates the particles so the digestive juices can get to them.

Yet the beans are baked—baked until they are mealy—without a skin being broken. They are nutty because they are whole.

Then we bake the beans, the tomato sauce and the pork all together, and get our delicious blend. The result is a dish in every way different from the old-fashioned, home-baked beans.

And Van Camp's are just as different from other brands of beans that are ready-baked.

One reason is, we have spent 47 years in learning how to make this perfect dish.

Then we use Michigan beans, picked out by hand from the choicest part of the crop. They are costing us now nine times as much as some other beans would cost.

We spend five times as much to make our tomato sauce as other sauce would cost us ready-made.

But you will see the reason why we pay the price if you compare other beans with Van Camp's.

Van Camp's BAKED WITH TOMATO SAUCE PORK AND BEANS

A delicious summer dish ready to serve. No fire is needed—no work whatever—if you serve it cold. Our chef does the cooking while you sit in the breeze. Think what that means in hot weather.

No other food is so nutritious as beans. They are 84% nutriment.

Meat, though it costs several times as much, has a lesser food value.

Beans are appetizing and hearty; all people like them. They should be a daily dish, not an occasional.

You will eat more of them when you serve Van Camp's. You will find them digestible. They will not ferment and form gas.

You will have a new idea of how good beans can be. They will be as staple as bread.

And people don't tire of Van Camp's.
